An official announcement from fashion's prime minister declares an immediate adoption of greater simplicity in gowning. Evolution at work doubtless eliminates from the tailor gown its stiffness, and borrowing from the classic Greek costume artistic grace, will show by a survival a fitness both becoming and graceful.

Designers are not slow to recognizthat while severity of style may bring out perfection of outline, the out perfection infinite grace that fo isge gives the fairest veilings and that she loses an in lescribable charm by arraying herself in tightflyting dull-colored garments. For posing, the revival of the Greek gown is pre-eminently a chosen attire; the approach to this has been gradual-the Watteau plait, the hood at the back and now the chiton or diploidon. This last is a long shawl doubled to make an oblong, having loops in the four cor-ners. A button is placed on the point of each shoulder and the middle of the shawl is of sufficient length to have within two or three inches of the ground The dress must be of some soft clinging material, cut princess shape, with flowing skirt and demi-train. The front and sides of the skirt are trimmed suitably, sometimes what is known as the Greek border bodice is modernized by diagonal folddress is threatening, and ladies who would not be in the rear are anxious to shall fill the requirements of the hour. Perhaps a cautionary word may not be amiss: To have a Psyche knot the first requirement is a Psyche; to wear an artistic dress there must be an artistic form, and every woman should clothe herself in accord with the claims of reason, individuality and beauty.

Now listen to a word of warning, all ye of long, sharp visage: If you contemplate wearing these, don't. To a full, round face, a shape like this gives piquancy, but to the visage described they only exaggerate its peculiarities. Of course, these bonnets go with the short-waisted, low-necked, scanty-skirted gowns with sashes under the arms and gloves to the shoulder, and the time seems hardly ripe for the styles of our great grand-mothers yet who can tell? With bodices that have a long and narrow V cut out back and front, a tiny, delicately gathered chemisette is often worn. This can be made in white lisse or crepe, or in some pale shade corres ponding with the rest of the dress.

For low bodices a pretty trimming is to have the left side completely covered with soft drapery like a succession of half circles, while coming from the right is an arrangement of long loops of rib-bons, flowers, lace, or passementerie, which frequently descends to the edge of the sk Tt.

Buggy riding with young men is essentially bad form, and a young lady in New York or any eastern city who should venture on such a breach would be sure to have her action misconstrued. I have said that communicants in Christian churches were disciplined if they so much as walked through a set to fill out quadrille or cottlion. Sometimes they were indicted before minor ecclesiastical courts for allowing informal carpet dances in their nonses, and at least one Presbyterian elder of note was cited for suffering his children to dance. Proving contumacious to the reprimand administered for the offence, he was deposed from his office and denied the right to "communicats" until ne gave token of repentance.

We are far enough from this middle age to get the full outline, proportions, and perspective of what is no longer a Those of us who disputed subject shared in the prejudices instilled by church and churchmen, can testify to the sincerity that made that prejudice principle.
